

Sunamp

Hot water solutions

Heated by an internal element, which is covered by a market-leading 10-year warranty, guaranteeing powerful showers and baths at the temperature that is perfect for you.

Super-Compact Energy Storage

The sleek new design and advanced storage technology makes it up to four times smaller than equivalent direct cylinders, freeing up valuable storage space in your home.

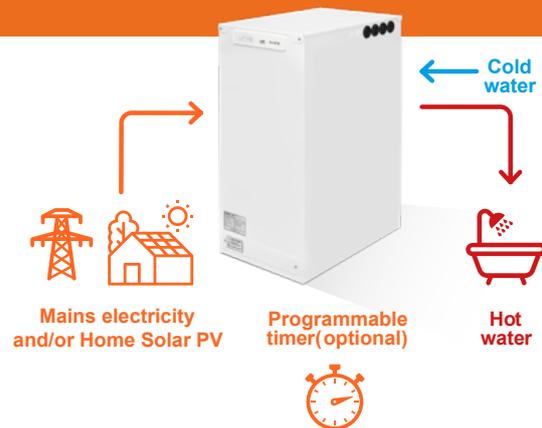

Traditional hot water cylinder

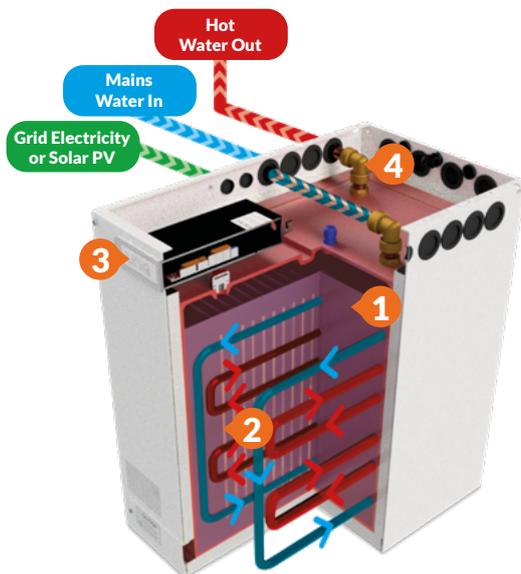

Sunamp heat battery

How it works

The high powered heat exchanger charged by mains electricity and/or Home Solar PV for high quality, mains pressure showers. It will easily fill several baths from one charge.

Sunamp on the inside...

- 1 Patented Formula**
Sunamp's patented and non-toxic phase change material formulation – storing four times more energy than water.
- 2 Heat exchanger**
High powered heat exchanger charged by mains electricity and/or Home Solar PV for high quality, mains pressure showers and baths.
- 3 User interface**
Simple user interface shows heat battery state of charge and operation.
- 4 High quality brass**
Quick and easy to install, with high-quality brass push-fit connectors supplied. With flexibility of orientation, with exits on three sides of the product.

Sunamp Premium Delivery & Install

Sunamp water heaters are a modern compact alternative to direct hot water cylinders, providing instant hot water (with no water storage) in your home. However, the installation process requires a high level of skill and diligence to ensure that everything works perfectly.

Why do we recommend Premium Delivery & Install?

Sunamp water heaters are **very heavy**, with the smallest version weighing **70kg** and the largest coming in at **220kg**. The unit **cannot be tilted by more than 45°** during the transportation and installation process and so special care must be taken during this time.

Sunamp water heaters come with the option of a market-leading 10-year extended warranty, however **to qualify for this extended warranty the installation must be completed by a competent person who is suitably qualified to carry out plumbing and electrical work and have successfully completed product training by Sunamp Ltd or an authorised training partner.**

Sunamp Premium Delivery & Install

Sunamp
10 Year
extended warranty

Alternative Delivery & Install

NOT APPROVED
invalidated warranty
